PROFESSIONAL SYNOPSIS

- Proficient in web development using Python (Flask), Java SE, HTML, and CSS.
- Good knowledge of software testing principles, including test case design, functional testing, and defect tracking.
- Familiar with version control tools Git and GitHub for efficient code management.
- Familiar with SDLC concepts and basic understanding of Agile methodology through academic projects.

Programming Languages

- C : basics , dyanamic memory allocation, pointers, structure,
- Java : Basics, OOP principales , collections
- Python : Basics, Collections, Modules,File handling.

Framework

- Flask (python) :
Flask-SQLAlchemy
Flask-WTF
Flask-Login
Session management
Jinja2 template inheritance & filters
Form handling and validation using Jinja2 + Flask-WTF

Frontend

- HTML5 , CSS3

Database

- MySQL : Joins , DDL ,DML ,DQL

Tools

- Git ,GitHub , VS Code

Software Testing

- Manual testing , Test case design and Bug tracking

Education

- **Shivaji University Kolhapur.** 2025
Bachelor of computer science
86%
- **Shree Yashwant Vidhyalay Kokrud Shirala Sangli** 2022
HSC
59 %
- **Datta seva vidhyalay Turukwadi Shahuwadi kolhapur** 2020

Projects

- **E-waiter**

Live On : <https://e-waiter-application.onrender.com/>

GitHub : <https://github.com/Ask1012/E-waiter-application>

Developed a full-stack restaurant management system to help waiters reduce manual errors and eliminate pen-and-paper order taking.

Built the backend using Flask, Flask-Login (LoginManager), SQLAlchemy ORM, and Jinja2 templates.

Designed the frontend with HTML, CSS, for a clean and interactive UI.

Implemented QR code-based menu cards.

- **Mock Mate : Mini Interview Scheduling Web App**

Live On : <https://mockmate-ytg1.onrender.com/>

GitHub : <https://github.com/Ask1012/MockMate>

A basic Flask application where users can schedule mock interviews by submitting a form with their details. The admin panel allows the admin to view registered users and send interview invites via email using Google Meet.

This project demonstrates form handling, routing, and admin-user workflow using Python and Flask.

Achievements & Awards

- 3rd rank in software project presentation.
